DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on September 26, 2003 has been entered.
2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

3. Claims 48 and 49 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 7.

Claim Rejections - 35 USC § 103

4. Claims 33, 36, 38, 39, 40-45, 50 rejected under 35 U.S.C. 103(a) as being unpatentable over Sesser (4,676,438) in view of Stoddart (632,795).

With respect to claim 33, 36, 42, 44 and 45, Sesser discloses an irrigation assembly comprising: a main pipeline 14; mobile towers 18; a plurality of drop tube

assemblies 22; a plurality of stationary troughs (as shown in the bottom left corner of figure 1). Sesser discloses the limitations of the claimed invention with the exception of the trough having a plurality of underground drains and a weir. Stoddart discloses a trough **a** having a plurality of underground drains **b** and a weir (one or both ends of the distributor are closed (lines 19-20). It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided a trough to the device of Sesser as taught by Stoddart to distribute liquids in fine streams or drops (Stoddart, lines 9-12).

With respect to claims 38, 39, 40, 41 and 43, Sesser in view of Stoddart discloses the limitations of the claimed invention with the exception of the trough being a pipe with a slot located in the top. Stoddart discloses a V-shaped trough having a slot located in the top. Providing a pipe (a circular or rounded shape) instead of a V-shape is a mere change in shape. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have provided a pipe (a pipe shaped trough) in the device of Sesser in view of Stoddart to decrease sharp edges.

Allowable Subject Matter

5. Claims 34, 35, 46, 47 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments with respect to claims 33, 36, 38, 39, 40-45, 50 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
